SUMMARY

Frontend-focused Software Developer with **2.7 years of experience** delivering high-performance, scalable web applications using modern technologies. Proficient in building responsive, maintainable UIs using React.js and JavaScript, with experience architecting solutions based on micro-frontend design principles. Adept at integrating RESTful APIs, managing complex application state, and optimizing frontend performance. **Skilled in deploying production-grade applications using Docker, Kubernetes, and CI/CD pipelines**.

SKILLS

- **Programming Languages:** JavaScript (ES6+)
- **Frontend:** React.js, Redux-Saga, HTML, Tailwind CSS, Bootstrap, Material UI, Redux Toolkit
- **Backend & APIs:** Node.js, Express.js, RESTful API Development
- **Core Competencies:** Full Stack Development, Docker, Kubernetes, Azure DevOps, Git/GitHub, CI/CD, Agile/Scrum
- **Tools:** Oracle SQL Developer, MongoDB

EDUCATION

Bachelor of Technology in Computer Engineering   2018–2022
R.C. Patel Institute of Technology, Shirpur   CGPA: 7.94

PROFESSIONAL EXPERIENCE

- Developed and maintained a fully responsive CRM interface using **React.js, TypeScript, and Material-UI**, delivering seamless user experiences across desktop and mobile.
- Improved frontend performance by **30%** through API debouncing, lazy loading, client-side pagination, and Redux state management enhancements.
- Architected and implemented a **micro-frontend architecture**, modularizing a monolithic UI into service-specific pods for improved scalability and maintainability.
- Automated **CI/CD pipelines with Azure DevOps**, reducing deployment cycles by 40% and ensuring code quality via integrated unit testing and linting.
- Containerized frontend applications using **Docker**, streamlining local development and deployments across environments.

PROJECTS

- **GymFit Pro**   Link
  React.js, Supabase, Node.js
  - Developed a fitness management platform featuring **role-specific dashboards** for trainers and members.
  - Enabled trainers to create and assign custom workout plans, allowing members to track progress and receive personalized updates.
  - Implemented secure authentication, profile management, and **real-time workout scheduling**.
  - Integrated **Supabase (Postgres + Auth)** for database and backend services, ensuring scalability and reliability.
  - Built an interactive dashboard with charts to visualize **member activity, attendance, and progress tracking**.
  - Designed a mobile-responsive UI with React.js and Tailwind CSS, providing a seamless experience across devices.
  - Deployed on Vercel with environment-specific configurations, achieving a production-ready setup.

ACHIEVEMENTS

- Launched six key features that enhanced user experience and operational efficiency.
- Recognized for excellence in software development at Jio Platforms Limited in 2024.
- Consistently resolved high-priority bugs under tight deadlines.
